SafeStat calculates a SafeStat Score to rank carriers in descending order by their safety status (i.e. a carrier with the highest SafeStat Score is the first ranked carrier in terms of poor safety status). SafeStat does not assign SafeStat Scores to all carriers. To obtain a SafeStat Score, a carrier must be deficient in at least two different Safety Evaluation Areas (SEAs). A SEA with a value from 75 to 100 is defined as deficient. SEA Values that are less than 75 are not used in the calculation of a SafeStat Score.
